--	--

Description

Front: Glatte Oberseite. Mit Kerbe und quadratischem Punzeneinschlag.

Rear: Rauhe bis stark oxydierte Unterseite.

Chop mark: A mark of undefined form made normally with a chisel-like tool, for example to test the purity of the core of a coin. It can also be the result of damage caused when the object was found.

Punched: Intentionally marked with a punch, both contemporary to the object and later. In contrast to a countermark of a much more simple design. Not to be confused with punches creating a positive image, which were used during the manufacture of a die.

Basic data

Material/Technique:

Silver; cast

Measurements:

Weight: 32.60 g; Diameter: 27-30 mm

Events

Created	When	600-500 BC
